

Cipher Labs Model CPT - 8001 Portable Terminal

As illustrated the Cipher Lab's CPT-8001 Portable Terminal

The Cipher Lab CPT-8001 is a Pocket Size Data Collection Unit that is available with a long range CCD reading capability or with a Laser reader. Light weight, low power consumption, 1Mb flash memory & 1Mb or 2MB SRAM. Has IR and IrDA connectivity and is supplied with Cipher Lab's MS Windows based Application Generator Software. Sled & Serial cables are also included. The CPT-8001 uses a Rechargeable Li-ion Battery and has a backlit graphic display with 21 key backlit keypad.

The terminal is fully programmable in 'BASIC' or 'C', or via the Cipher Labs 8000AG Application Generator software program, and incorporates 1MB program memory and 1MB or 2MB for data, making it suitable for a wide range of data collection applications. Measuring only 122 x 56 x 26mm and weighing in at just 130gm (including batteries). InfraRed and IrDA communications is supported from the terminal, and RS232, USB (Virtual Comm. port) or modem via the 8000-CR communications cradle.

Rechargeable batteries, power supply and charging cradle are included in the prices indicated.

Cipher CPT-8001 USB 2Mb Portable Terminal with long range CCD \$ 825.00 incl GST.

Spare rechargeable Li-ion battery 700 mAh \$ 66.00 incl GST.

Allow up to \$13.20 incl GST for packaging and delivery costs.
