

## Nexa CM-500MV2 Portable CCD Scanner

This handy budget sized personal bar code reader and data collector can be used remotely to capture and store thousands of asset or library size bar codes.

Connects to the computer with a USB cable in HID mode, this means that the connection requires no additional software or drivers and is completely plug and play.

The CM-500MV2 with additional memory capacity also incorporates an on board clock and can be optionally used to record and report Time & Date of each remotely recorded scan (an obligatory requirement for true audits).

Powered by an on board Li polymer battery (included) that is charged every time the CM-500MV2 is connected to the computer via the USB cable. Easy downloading of data is via button push or scanning of command barcode.

**Nexa CM-500MV2 CCD Scanner Including USB HID Cable \$297.00 incl GST.**  
Includes **FREE** registration of **Bar-Key.Exe** (see Dataman's web site for greater detail).

Available from ***The Library Service Barcode Specialists*** For applications requiring advanced Time and Date formatting; CSV or TSV record output the CM-500M is compatible with Dataman's versatile Bar-Key data editing software. Data can be downloaded to Excel or similar spreadsheet.

Allow up to \$16.50 including GST for packaging and recorded delivery costs within Australia.
